Our values

Excellence Whatever you do, do it at full blast. Spritecs strives excellence in every project we undertake, every technology we apply and every industry we service. Doing our work professionally is the rock on which we stand.

Quality Here things are quite simple: there is only one degree of quality we admit – superlative. This approach finds expression in our attitude to the projects we develop, to client satisfaction, to building our team and empowering your business with our solutions.

Partnership Partnership is not just a combination of letters for us. We consider it to be the key to successful collaboration between Spritecs and your company. Mutual goals, mutual reliance and mutual benefits.

Team Behind every successful project, behind every achievement and accomplishment there are our people, who contribute their professionalism, dedication and efforts to what Spritecs is. And we do our best to give back.

The success of any project depends on communication between the people involved in the process. Staying in ongoing dialogue and building sustainable relationships with our clients allows Spritecs team to achieve top level quality and customer satisfaction.

Focus domains

There was no single minute of hesitation when the question of focus industries arose. For Spritecs it is definitely highly productive software solutions for healthcare and insurance business domains. The choice was predetermined by the rich expertise our team has gathered in delivering industry specific solutions:

- ▶ Electronic medical records
- ▶ Insurance accounting and billing systems
- ▶ Practice management systems
- ▶ Professional portals, etc.

Our philosophy is to do what we can do best and put our whole soul into it. We believe that real success is achievable only in this case. And we keep investigating and researching to stay in the forefront of healthcare and insurance IT trends and development directions.

All Spritecs efforts are dedicated to providing medical specialists and insurance carriers with the software that best suits their individual business needs. Software created for experts by experts.
